

The BAXT logo is presented in a bold, white, sans-serif font, enclosed within a red rectangular box. This box is positioned at the top center of the page, which features a background of red geometric shapes that create a sense of depth and perspective, resembling a stylized tent or a series of converging lines.

BAXT

PAINTSHOP PRODUCT RANGE

DRIVEN TO PERFECTION

BAXT-PRODUCTS.COM

PRECISION AS STANDARD, PERFORMANCE GUARANTEED

BAXT is a leading provider of premium consumables for the marine, composites, and production finishing sectors.

Our paintshop product range covers everything from booth protection and specialised fillers to polishing compounds and precision sanding solutions. Each product is designed to meet the specific demands of professional finishing work.

Whether you're working with carbon fibre composites, marine gelcoats, or high-temperature applications, BAXT provides the reliable tools and materials you need to get the job done right.

**QUALITY PRODUCTS.
PROVEN PERFORMANCE.
THAT'S BAXT.**

We've recently swapped out our old brand consumable products for BAXT, and had instant results! It's scary changing brands that you're used to, but with BAXT it's been a pleasure. I would not hesitate to try any new BAXT products in the future.

PAINTSHOP MANAGER

BAXT WP10

5-Layer Spray Booth Wall Protector

The BAXT Multi-layer Booth Wall Protector is fast to apply and can last 9–12 months with its innovative 5 layer construction.

WP10 is designed for easy & fast tape-free application thanks to overlapping self-adhesive sheets with no need for accessories or special tools. Each roll comes ready packed in a dispenser box.

Application only requires replacing once per year and is the only option available with 5 durable layers. Each layer has a tacky, statically charged surface which acts like a magnet to airborne contaminants.

Roll size 80m long x 77cm wide

JASPER GOLD POLYESTER FILLER 3L

FILLERS

Jasper Gold, has exceptional sanding qualities, can be used for heavy fill applications, and has high elasticity and flexible properties. The creamy, smooth formula is easy to mix, easy to apply & spread, and due to the Quick-Cure properties, is extremely light once activated & hardened.

Key Points:

- Superior adhesion to Steel, Aluminium, Fibreglass, Galvanised Steel & Carbon
- Provides an incomparable finish once sanded & clear-coated
- Excellent longevity on parts highly stressed by vibration
- Very low density & lightweight
- Hardening time 20–30 minutes at 20°Cww
- A unique formula, designed to spread & level to a smooth finish

CARBONFIL™ BLACK POLYESTER FILLER 1L

Polyester filler, with an excellent filling capacity and very easy to sand. It is recommended both for filling and little touch-ups. Thanks to its high black dye content, CARBONfil™ can be clear coated over to retain true black visual aspect.

Key Points:

- High elasticity and flexibility, and perfect for pre-preg carbon fibre hole filling
- Provides an incomparable finish once sanded and clear coated
- Excellent longevity on parts highly stressed by vibration
- Thanks to its high black dye content, CARBONfil™ can be clear coated over to retain true black visual aspect

CARBONFIL™ HIGH TEMP BLACK POLYESTER FILLER 1L

Polyester filler, tested to withstand temperatures of up to 200°C. With an excellent filling capacity and is very easy to sand. It is recommended both for filling and little touch ups. Thanks to its high black dye content, CARBONfil™ can be clearly coated over to retain true black visual aspects.

Key Points:

- High-Temperature Filler – up to 200°C Tested to withstand temperatures of up to 200°C
- Excellent Filling Capacity Polyester filler, applicable with a knife or plastic spreader, with an excellent filling capacity and is very easy to sand. It is recommended for both filling and small touch-ups
- High Black Dye Content Thanks to its high black dye content, CARBONfil™ High Temp can be clearcoated over to retain a true black visual aspect
- Perfect for Carbon Fibre Perfect for pre-preg carbon fibre hole filling. Extremely light once activated and hardened, this is the best finish on the market once sanded and clear-coated

POLISH

SOLO EXTREME ONE STEP COMPOUND 1L

Introducing BAXT Solo Extreme, a game changer in one-step compounds: Helps pads effortlessly glide across the surface, erasing even the most stubborn P1500 sanding marks at an astonishing pace, requiring minimal exertion.

Key Points:

- Exceptional permanence – no revisits required
- Effortless time and cost savings
- Elevated performance
- Remarkably crystal clear
- Erases holograms and swirl marks with precision
- Significantly reduces operator exposure to hand-arm vibration (hav)

SOLO 1000 ONE STEP POLISH 1L

BAXT Solo 1000 one Step compound, when used alone, effortlessly glides over the surface and effectively eliminates P1500 sanding marks, delivering rapid results with minimal effort. This eliminates the need for P3000 abrasive discs, resulting in significant time and cost savings. Throughout the process, the transparency of the product allows operators to watch these marks vanish for good.

Key Points:

- Lasting perfection – no need for touchups
- Crystal-clear results
- Time and money saver
- Seamless application
- Reduces operator's exposure to hand-arm vibration (hav)
- Effortlessly erases holograms and swirl marks

PREMIUM CUT 3000 POLISHING COMPOUND 1L

BAXT Premium Cut 3000 is a potent abrasive liquid compound designed for refinishing paints, serving to eliminate abrasive scratches in the paint rectification process. It has also proven effective in removing oxidation, scratches, blemishes, and more, whether on the original manufacturer's paint or other surfaces.

Key Points:

- Improved handling characteristics
- Potential for up to 30% reduction in usage
- Minimal effort required for cleanup
- Extended working time
- Achieves a favourable finish
- Transparency allows for scrutiny of remaining sanding scratches before proceeding
- Minimal sling during application
- Can be employed with or without the addition of water
- Significantly reduces operator exposure to hand-arm vibration (hav)

MICROCUT 5000 ANTIHOLOGRAM POLISH 1L

BAXT MicroCut 5000 stands as a highly refined polish, specialised in eradicating swirl marks and holograms from both refinish and original paint.

Key Points:

- Swift and efficient removal of swirls and holograms
- Consistently delivers a swirl-free finish, even on the most challenging surfaces
- Designed for application after the machine polishing step

M100 GELCOAT AND MARINE COMPOUND 1L

BAXT M100 fast-cut Polishing Paste efficiently removes sanding marks and significant imperfections from production and tooling gel coat surfaces.

Key Points:

- Can serve as a one-step solution when working from P800 or P1000, ideal for quickly polishing white production gel coats in areas where a mirror finish isn't necessary

SANDING

NEXUS 3000 ABRASIVES DISCS

Designed specifically for the crucial paint keying stage before the blending process, these discs are poised to transform your paint preparation workflow. With their innovative pyramid or triangular block structures, these discs incorporate multiple layers of fine-grade abrasive mineral.

Key Points:

- Abrasive wears away for a consistent finish and long lifespan
- Cutting-edge technology for superior metalworking and finishing
- They incorporate multiple layers of fine-grade abrasive mineral
- These discs feature innovative pyramid or triangular block structures
- Specially designed for the paint keying stage before the blending process
- 75mm or 150mm

MULTIFLEX CLOG FREE SANDING PADS QTY 200

BAXT Multiflex is a brand-new innovation developed to ensure no clogging occurs when sanding. With 143 holes per individual pad, this pad ensures a clog-free even application when applied. Each individual pad is 125mm x 115mm and comes in boxes of 200, it also varies from P180 to P1000 meaning there are options available for any project.

Key Points:

- 200 Pads per box
- For sanding contoured and irregular surfaces
- Enables even pressure to be applied
- A variety of grits are available ranging from P180 to P1000

CRYSTAL CUT ABRASIVE DISCS QTY 50

For high-quality sanding tasks requiring precision and superior finishing, consider the BAXT Crystal Cut Disc. These discs combine the durability of the film backing with the fast-cutting, long-lasting properties of aluminium oxide mineral abrasive. Aluminium oxide is a preferred choice among professionals for its exceptional cut-rate and extended lifespan. This mineral maintains its toughness, self-fracturing to reveal fresh cutting edges, unlike traditional natural abrasives that tend to lose their sharpness quickly.

Key Points:

- Tough and self-fracturing abrasive
- Various grits available
- 150mm

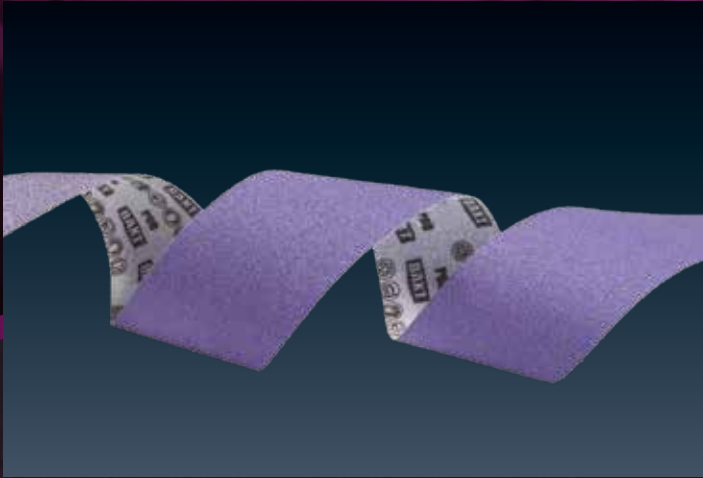

SOFT BACKED SANDING SPONGE QTY 70

Introducing the BAXT Soft Backed Sanding Sponge Series, a range of specialised foam pads meticulously crafted for precision hand sanding in diverse applications. From confined spaces and along edges to rims and intricate surfaces, each sponge within this series is designed with a soft construction that minimises the risk of surface damage.

Key Points:

- Superfine or Fine

CARBON™

CARBONITE™ SANDING ROLLS

BAXT CARBONite Sanding Rolls are a premium range of abrasives designed specifically for the sanding of high strength composite materials.

Key Points:

- Convenient dispenser boxes keep the workshop tidy and prevents trip hazards
- Velour backing ensures quick and easy placement and removal from sanding equipment
- Uniform grain size and depth & spread of grit ensures consistent even sanding. Perfect finish, first time
- Tear and wear resistant, flexible paper backing enhances performance further
- 71mm x 25m and 115mm x 25m

CARBONITE™ SANDING DISCS **QTY 50**

Revolutionary 150mm sanding discs designed for professional craftsmen who demand superior performance. The unique multi-hole pattern maximises dust extraction while the NANO ZrIOTM ceramic grain blend delivers unmatched cutting speed and longevity.

Key Points:

- Innovative multi-hole design for maximum dust extraction and cleaner working environments
- Progressive catalyst coating eliminates swirl marks, pilling, and clogging
- Superior tear and wear resistance with flexible PExSCRTM backing for enhanced performance
- Unique Zirconium, Aluminium Oxide, and Ceramic grain blend stays razor-sharp longer
- NsFCITM Super Flow Coating repels dust and prevents clogging
- Hyper-consistent grain distribution ensures even sanding and perfect finish every time
- Compatible with a wide range of sanders for versatile application

C5 DISPOSABLE COVERALL (LAMINATOR)

The BAXT C5 Disposable Coverall is the best of both worlds! This hybrid coverall suit has full protection against liquids at the front, with a fully breathable back panel, that is dust and splash resistant.

Key Points:

- Disposable coverall
- Liquid and dust protection
- Excellent breathability
- Available in a variety of sizes: S, M, L, XL, XXL

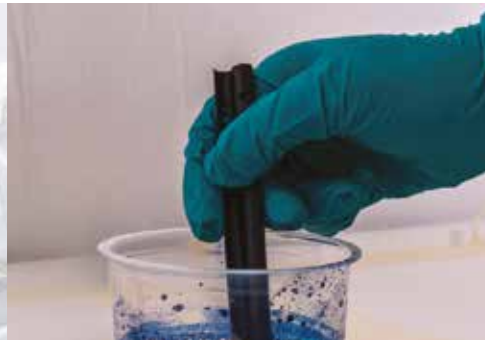

CARBONGRIP™ PREMIUM NITRILE GLOVES

QTY 100

The BAXT CARBONGrip Premium Nitrile Gloves have been designed specifically for the composite, engineering and automotive market, and for the handling of composite material. Tested thoroughly by professionals in the industry, the gloves are recommended for extreme comfort and durability.

Key Points:

- For the handling of composite materials
- Specially formulated to be robust and resistant
- Non-slip, 100% silicone free
- Lasts up to 5x longer than regular disposable gloves
- Fish scale exterior design for superior grip
- Internal grip minimises slippage and hand fatigue
- Extended 3 inch cuff
- Available sizes: S, M, L, XL

CHEMSHIELD GREEN NITRILE GLOVE

QTY 100

BAXT CHEMSHIELD are high-quality, durable nitrile gloves that are resistant to a range of chemicals and conforms to the hand during use for a comfortable fit. The beaded cuff provides extra strength and helps prevent liquid roll back, while the textured palms and fingers improve grip, particularly when working in wet or oily conditions.

Key Points:

- Ambidextrous
- Nitrile formulation conforms to the hand during use
- Resistant to a range of chemicals
- Ultra-heavyweight construction is very tough, durable and long lasting

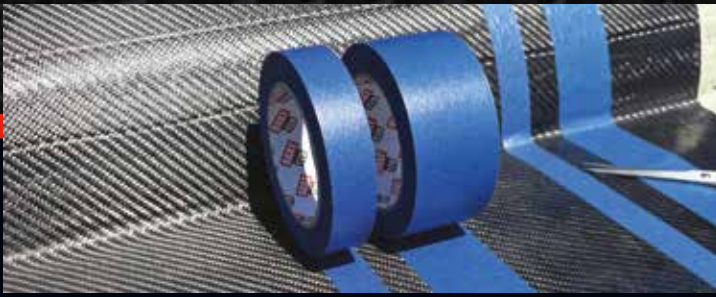

LATEX GLOVES HD

QTY 50

Ultra heavy duty tear-resistant gloves, made with the best quality latex for high levels of elasticity and comfort. The textured palm and fingers give improved grip, particularly with wet products. Specifically designed for the most demanding jobs in the Marine, Automotive, Aerospace and Composites industries.

Key Points:

- Ultra heavy duty latex/natural rubber gloves
- Offers excellent elasticity and extra resistance to cuts, puncture & slashes
- Textured palms and fingers
- Lightly powdered
- Ambidextrous
- Available sizes: S, M, L, XL

T29 PREMIUM 14 DAY UV RESISTANT MASKING TAPE

Professional-grade blue masking tape designed for versatility across multiple surfaces. Features medium adhesion ideal for smooth surfaces like glass, tiles, and treated wood, with guaranteed clean removal for up to 14 days. Engineered with UV and water-resistant properties for reliable performance in both indoor and outdoor environments.

Key Points:

- Universal application on multiple surfaces including glass, tiles, and treated wood
- Medium adhesion strength perfect for smooth surfaces
- Clean removal for up to 14 days with no damage or residue
- UV and water-resistant for reliable indoor and outdoor performance
- Distinctive blue colour for easy identification on job sites

T15 HIGH PERFORMANCE MASKING TAPE

The strength of the BAXT T15 High Performance Masking Tape ensures consistent surface contact and secure holding power whilst remaining intact when removed.

Key Points:

- High Strength
- Waterproof and Solvent Resistant
- Eliminates paint bleed-through
- Easy to use with high levels of conformity
- Tear resistant
- Available widths: 24mm & 48mm

**PRECISION AS STANDARD,
PERFORMANCE GUARANTEED**

WWW.BAXT-PRODUCTS.COM

T5 PREMIUM MASKING TAPE

The T5 tape is a saturated semi-crepe paper masking tape coated with a specially developed cross-linked solvent-based natural rubber adhesive. It is solvent and thinner-resistant and is easy to remove with no residue left behind.

Key Points:

- Solvent and thinner resistant masking tape
- Easy to use with no residue
- Heat resistant up to 80° for 30 minutes and suitable for use up to 60 mins at 60°
- Suitable for water and solvent-based paints

CZM – PREMIUM MASKING FILM

The BAXT CZM Purple Premium Masking Film is a top quality, high density plastic sheeting with superior static cling properties for material surfaces. Avoid moisture imprinting or ghosting on painted surfaces with this specialist range designed to meet the highest demands of professional painters who deliver the perfect finish.

Key Points:

- Use to resist imprinting and ghosting on painted surfaces
- Achieve better handling and increase cling to surface
- Treated to resist primer, base and clear coat flaking
